

# How to Install Quick Link Client or Laptop Client

Applies to ArchiveOne Express; Topic Last Modified: 2009-10-15

## Note

This topic explains how to install either the Quick Link Client or Laptop Client for ArchiveOne Express.

## Before You Begin

Before you perform the procedure in this topic, be aware of the following:

- Proper user permissions to install software on the client PC

## Procedure

### To install the Quick Link Client

1. Use **Start**->Run to access ArchiveOne Express' installation path which defaults to  
"\\ArchiveServerName\C\$\Program Files\C2C Systems\Archive One"
2. Locate & run the **QLC Installer** "C2C Archive One Policy Manager Quick Link Client.msi" (alternatively locate the C2C Archive One Policy Manager Laptop Client)
  - You'll be clicking Next through this Wizard, only making optional changes to one screen
3. The second screen of the **Wizard**, Customer Information, can optionally be modified to contain a specific User Name and Organization
  - These values are only visible to this wizard and will not affect the operation of the client software
4. Click the **Install** button to install the software
5. Finish the wizard

## For More Information

For assistance with more features of ArchiveOne Express, see the other ArchiveOne Express documentation available from C2C:
